

# COVID-19 tests are now available through your pharmacy benefit.

During these difficult times, one thing should be easier: getting tested for COVID-19. As of January 15, you can get COVID-19 tests for free at your local pharmacy.

## How to get free at-home COVID-19 tests

You can use your Express Scripts® pharmacy benefit to obtain up to eight (8) tests per month for a \$0 copay. *Please note that since the Express Scripts COVID 19 OTC test network solution is limited to eight (8) tests per 30 days, you will not be able to purchase package sizes that contain greater than eight tests at one time as it will exceed the limit.*

Here's how:

- 1) Visit a [participating pharmacy](#) and select a COVID-19 at-home test.
- 2) Bring your test to the **pharmacy** counter (not the general check-out register) and present your prescription benefit card to the pharmacist. The pharmacist will process the test for a \$0 copay.

## Submitting a manual claim

If the COVID-19 Test does not process for \$0 copay at the pharmacy (and you have not used your allotment of eight tests per month) do not worry. You can submit a manual claim for reimbursement for COVID-19 at-home tests purchased at a participating pharmacy after Jan. 15, 2022.

To submit a manual claim, please visit our website <https://express-scripts.com/covid-19/resource-center>, and after logging in using the 'Login' button, open 'Benefits' and then 'Forms'. You will need to complete the Prescription Drug Reimbursement form and submit it along with a pharmacy receipt to receive reimbursement.

## Protect Yourself From COVID-19: Get Vaccinated

COVID-19 vaccines reduce the risk of getting and spreading the virus that causes COVID-19. They also help prevent children and adults from getting seriously ill even if they do get COVID-19 and can help protect them from serious short and long-term complications.

Millions of people in the United States have received COVID-19 vaccines since they were authorized for emergency use by FDA. COVID-19 vaccines have undergone and will continue to undergo the most intensive safety monitoring in U.S. history.

To learn more about the vaccine and find resources by state, visit the [Express Scripts COVID-19 Resource Center](#).
